Partstooob

Partstooob is an imaginary CSS framework. It is named after “bootstrap” however with all the original letters been reversed.

The site follows a one-page design principle where all the sub-sections are combine into one single page.

The site contains one navigation bar, which always float at the top of the viewpoint, and 4 sub-sections, namely “About”, “Usage”, “Feedback” and “Contact”.

Click [index.html](#) to view the page.

P.S.

[Chrome](#) is recommended to view the site.

CSS:

Responsive Design: The elements of the whole sites strictly follows the grid system design, which enables responsive view across all screen sizes.

Customized CSS: One prominent customized CSS effects is the “Parallax” effects, locating at the “Usage” section. While scrolling, the background image would move at a speed that is different from the viewpoint. It creates a depth view for the images and adds more visual dynamics to the site.

Javascript:

JQuery Form: The “Feedback” is where the JQuery effects locates. A successful submission of the form would append one more elements to the feedback comment list. The form also enforces input validation where no empty input is allowed. When input validation been breached, an alert would appear at the top of the form for displaying error messages.
