Abstract

I am a 3rd year undergraduate student studying in the National University of Singapore. I major in Computing Science and minor in Management of Technology. I have experience and a strong passion in software engineering.

Experience

National University of Singapore - Teaching Assistant   **Sem1, 2015/16**

Undergraduate Teaching Assistant for Dr. Cheng Ho-lun, CS3241: Computer Graphics

Autodesk Asia Pte Ltd - Software Engineer Intern   **Jan-Jun 2015 (6 months)**

1. Project - Enterprise customer payloads monitoring web application. (C#, Front End + Back End)

2. Project - Licensing framework test automation. (Python)

Education

National University of Singapore   **2013-2017 (Expected)**
Current GPA 3.12/4

Computer Science   -Major   Management of Technology   -Minor

University of California, Berkeley   **2015-2015**
Summer School, EECS, GPA 3.3/4

Awards & Acheivements

Intern Certificate of Achievement	**Autodesk**	**2015**
SM2 NUS Full Scholarship	**Singapore Ministry Of Education**	**2013**

Skills

Java   I have experience in using Java to do software projects. I was a main contributor of [MagiCal](#) (A Java to-do list application).

C/C++:   I have experience using C and C++. I do code in C when taking the Operating System course and use it to implement POSIX shell and system calls. I do code in C++ in my graphics course to use OpenGL.

Web Application Development: I have experience in working on both front-end and back-end web application development. I was full a stack developer for [Foodi](#) (Lite social site build with Python).
